### PROJECTS

#### 1. Project Budget Line Items

Each of the following headings are included on each project budget and are defined as follows:

##### 1a. Legal/Mediation/Litigation

This item includes the professional services required to negotiate, develop agreements, and/or litigate. The budget costs reflect anticipated professional services by our general and/or specialized counsel.

##### 1b. Government Relations / Community Relations

Government Relations: These costs reflect the fees associated with efforts in Washington D.C. and Sacramento to find outside sources of funding for cleanup projects. The fees have been proportionately allocated to the related projects requiring outside funding. The allocation rate is based upon funding provided to activities in the operable units. The rate is reviewed on an annual basis and adjusted accordingly. The rates for FY 24/25 are shown below.

Community Relations: The WQA disseminates information to a large audience throughout the year with the use of approximately eight to ten full-color inserts exclusive to the WQA, as well as e-mail "blasts" to approximately 60,000 readers. These are issued in conjunction with Earth Day, Civic Leadership, Water Awareness and other special sections or events. The WQA has also developed a comprehensive social media communications plan that capitalizes on social media's increasing influence to communicate its goal to the general public. The fees are allocated proportionately among the 43 projects that are included in the budget.

For FYs 18/19, 19/20, 21/22, 22/23, 23/24 and 24/25, the treatment and remediation costs are funded by the SWRCB DFA Proposition 68 grant funds.

#### SAN GABRIEL VALLEY WATER COMPANY - PLANT 11 (See page 5)

The WQA Board authorized the use of Restoration funds in prior years to offset a portion of SGVWC's treatment and remediation costs for Plant 11. The federal funds for Plant 11 were utilized in FY 9/10; no federal funds have been allocated since that date. Plant 11 continues to operate with costs currently funded by SGVWC and Proposition 68 funds. For FYs 18/19, 19/20, 21/22, 22/23, 23/24, and 24/25, treatment and remediation costs are funded by the SWRCB DFA Proposition 68 grant funds.

SGVWC plans to construct a new PFAS treatment facility utilizing ion exchange technology with a capacity of 5,000 gpm. The overall cost is projected at \$7.2M. During the FY 22/23, the WQA Board awarded \$2.0M of Restoration (FFPA) funds to partially offset the cost of construction. A portion of the award is included in the FY 24/25 budget with the balance of the award to be expended in subsequent years.

### **SAN GABRIEL VALLEY WATER COMPANY - PLANT 1 PFAS (See page 6)**

The project is located in the City of El Monte and involves the construction of a PFAS treatment facility utilizing ion exchange technology. The proposed treatment facility will be able to treat any combination of Plant 1 Wells with a design capacity of 5,000 gpm. The overall cost is projected at \$6.65M. During the FY 22/23, the WQA Board allocated \$1.025M through the FFPA process, of which \$512K is included in the budgeted expenses for FY 24/25, and the remainder to be expended in subsequent years.

### **SUBURBAN WATER COMPANY - PLANT 201 PFAS Treatment Plant Phase 1(See page 7)**

Suburban Water Company is involved in the design and construction of a 10,000 gpm ion exchange equipment for the removal of PFAS contamination. The treated water will conveyed into Suburban Water Systems existing distribution infrastructure. The WQA Board has allocated FFPA funds to partially offset the cost of construction.

### **WHITTIER NARROWS OPERABLE UNIT (WNOU) (See page 8)**

The WQA is assisting the U.S. Environmental Protection Agency (EPA) and the Department of Toxic Substances Control (DTSC) in developing a long-term plan to guarantee the continued operations of the WNOU remedy and to ensure that the remedy is performing as required by the WNOU Record of Decision (ROD). The plan currently calls for the San Gabriel Valley Water Company (SGVWC) to assume operations of the treatment plant. In order for SGVWC to assume operations capital upgrades are required. The upgrades include the construction of an onsite reservoir, construction of blending controls and a 3,000 gpm booster station as well as an updated pump station and disinfection equipment. In addition, a 7,000 linear foot blending pipeline is necessary to bring needed blend water from SGVWC's existing distribution system to facilitate long term operation of the treatment facility. The costs associated with the capital upgrades total approximately \$15M and are being funded by an agreement between EPA, DTSC and state funding through Proposition 1, with a preliminary Proposition 1 award of up to \$7.1M. Any costs associated with WQA involvement are currently being funded by WQA.

### 3. **BALDWIN PARK AREA OPERABLE UNIT - LPVCWD (See page 12)**

The 2,500 gpm groundwater treatment project was constructed in 2000 for the La Puente Valley County Water District (LPVCWD). The plant utilizes air stripping, ion exchange and ultraviolet light to treat VOCs, Perchlorate, n-nitrosodimethylamine (NDMA) and 1,4-Dioxane. The treatment and remediation costs for the project are funded through the Baldwin Park Operable Unit (BPOU) Project Agreement. In addition, LPVCWD tested waste brine destruction methods resulting from the operation of the ion exchange treatment technology. The regenerable ion exchange treatment equipment was subsequently replaced with more efficient single pass ion exchange treatment equipment thereby eliminating all waste brine discharges. In addition to the ion exchange treatment equipment, LPVCWD constructed a new onsite production well. The costs for the completion of the ion exchange treatment equipment and the new well were reflected in the FY09/10 budget and were funded through the BPOU Project Agreement, a USBR Title XVI award, and Restoration funds approved by the Board. The FY 24/25 budget includes the subsequent treatment and remediation costs that are being funded through the BPOU Project Agreement.

Additionally, LPVCD is constructing a Nitrate Treatment Facility. The project involves the design and construction of a 1,500 gpm regenerable ion exchange equipment for the removal of nitrate contamination. The treated water slip stream of water will be re-blended upstream of additional required treatment. The overall cost is projected at \$2.8M. During the FY 22/23 the WQA Board awarded \$1.275M through the FFPA process which was paid to LPVCWD during FY 22/23.

### 4. **BALDWIN PARK AREA OPERABLE UNIT - PLANT B6 (See page 13)**

The 7,800 gpm groundwater treatment project at San Gabriel Valley Water Company's (SGVWC) existing B6 well field is currently operating under its amended water supply permit. The project removes VOCs, Perchlorate, NDMA and 1,4-Dioxane from the groundwater with a combination of treatment technologies including air stripping and single pass ion exchange treatment equipment. The project also includes four extraction wells at two extraction locations near the southwestern edge of the BPOU. In addition, SGVWC was required by the DPH to construct an additional fixed bed ion exchange treatment system for the removal of nitrates. The second round of funding from Proposition 84, Section 75025 provided funding for the nitrate system. SGVWC is also planning the installation of an advanced UVFlex modular treatment system for 1,4-dioxane and NDMA at an estimated cost of \$2.2M. This system would reduce the amount of energy necessary to operate and optimize the treatment of contaminants. Proposition 1 funding of a portion of the UVFlex project was approved. In FY 22/23, the WQA Board approved an FFPA award of \$1.29M for this project, of which \$615K has been paid in FY 22/23 with the remaining award to be paid in FY 24/25. The FY 24/25 budget also includes treatment and remediation costs that are funded through the BPOU Project Agreement.

The 7,800 gpm groundwater treatment system at Valley County Water District's (VCWD) Arrow/Lante well field removes Perchlorate, NDMA, 1,4-Dioxane and VOCs utilizing treatment systems similar to those used in the B6 project. The project includes two extraction wells (SA1-1 and SA1-2) and a treated water pipeline to Suburban Water Systems' (SWS) existing distribution system. VCWD has replaced its existing regenerable ion exchange treatment equipment with the more efficient single pass ion exchange treatment equipment. The FY 20/21 budget included costs for the ongoing rehabilitation of a groundwater extraction well and a liquid phase granular activated quench system. The WQA Board allocated Restoration funds to partially offset the cost of design and construction of these systems. Additionally, the second round of funding from Proposition 84, Section 75025 provided funding for bypass piping to address nitrate contamination. The FY 24/25 budget includes ongoing treatment and remediation costs that are being funded through the BPOU Project Agreement.

VCWD is upgrading and rehabbing the Lante Plant at an estimated cost of \$1.8M. In FY 22/23, the WQA Board approved an FFPA award of \$1.16M for this project, of which \$91K was paid in FY 22/23, with the remainder projected to be completed in FY 23/24 and FY 24/25.

**16. EL MONTE AREA OPERABLE UNIT - Westside Shallow Remedy (See page 26)**

In FY 06/07 the Westside Performing Settling Defendants (WSPSD) constructed additional monitoring wells required by EPA to fully characterize the extent of contamination in the western portion of the El Monte Operable Unit (EMOU). In FY 07/08 the WSPSD began construction of VOC treatment facilities and conveyance pipelines. In the event that emergent chemical contamination is found appropriate treatment will be added. The project work meets the west side shallow zone remediation requirements of EPA's EMOU ROD. The WQA Board allocated Title XVI funds and Restoration Funds to offset the cost of construction of the VOC facilities and pipelines and the funds have been fully utilized. Construction was completed in FY 12/13 and the project is now fully operational. Treatment and remediation costs are being funded by the WSPSD. However, recent data indicates the need to construct additional advanced oxidation treatment for destruction of 1,4-dioxane with the additional construction costs being funded by the WSPSD. WSPSD has constructed seven additional shallow zone extraction wells due to the lowering groundwater table, with costs being funded by the WSPSD.

The WSPSD is constructing new groundwater conveyance piping for the additional seven wells to the existing treatment facility along with necessary electrical upgrades and controls. The proposed capital improvements are estimated to be \$8.0M. The WQA Board has allocated FFPA funds of \$1.0M to partially offset the cost of construction which has been paid in FY 23/24.

**17. EL MONTE AREA OPERABLE UNIT - Eastside Shallow Remedy (See page 27)**

During FY 07/08, the Eastside Performing Settling Defendants (ESPSD) began construction of extraction wells, re-injection wells, conveyance pipelines and a VOC treatment facility. In the event that emergent chemical contamination is found, appropriate treatment will be added. The work meets the east side shallow zone remediation requirements of EPA's EMOU ROD. The WQA Board also allocated Title XVI funds and Restoration funds to offset the cost of construction. The FY 15/16 budget included capital costs associated with the project construction and staff time associated with project coordination and processing federal awards. The Title XVI and Restoration funds have been fully utilized as of FY 15/16, and no further funding has been provided as of FY 21/22. The construction has been completed and the project is now operational. Treatment and remediation costs are being funded by the ESPSD.
