## AGENDA

**Committee Members:** Lynda Noriega, Mark Paulson and Robert DiPrimio

**Liaison Member:** Dave Michalko

- I. Call to Order
- II. Remote Participation Declaration - AB 2449  
[Government Code Section 54953(f)]
  - a. Notification of Just Cause
  - b. Emergency Circumstances Requests
- III. Public Comment
- IV. Workshop on Draft Budget for Fiscal Year 2026-2027 [enc]
  - a. Draft Budget for FY26/27
  - b. Five-Year Projections
- V. Executive Director's Report
- VI. Adjournment

# SAN GABRIEL BASIN WATER QUALITY AUTHORITY

1720 W. Cameron Ave., Suite 100, West Covina, CA 91790 • 626-338-5555 • info@wqa.com • wqa.com

## AGENDA SUBMITTAL

**To:** WQA Administrative / Finance Committee  
**From:** Randy Schoellerman, Executive Director  
**Date:** April 15, 2026  
**Subject:** **Budget Workshop for FY 26/27 – Version v2**

---

### Discussion

The budget for FY 26/27 involves the participation of several interested parties – the WQA Board of Directors, the Water Producers, the Responsible Parties (RPs), the Prescriptive Pumping Rights Holders and the public.

The purpose of the budget is to project the costs for the upcoming fiscal year and determine the revenues necessary to cover those costs. WQA's budgeted costs are funded by assessments that the WQA charges on prescriptive pumping rights in the Main San Gabriel Basin. Funding also includes grants from the U.S. Bureau of Reclamation (USBR), California Department of Toxic Substances DTSC (assumed funding responsibility from EPA as of 9/1/24), the State Water Resources Control Board (SWRCB) Division of Financial Assistance (DFA) Proposition 1 and Proposition 68, and Responsible Parties (also known as PRPs or CRs).

There are a total of 197,610 acre feet of prescriptive pumping rights in the Basin. The WQA assessment is budgeted at \$12 per acre foot, for total assessment funding of \$2,371,320.

The Budget Workshop presentation will also include a discussion of the WQA Reserve Fund Policy and the effect that the FY 26/27 Budget will have on the annual assessment level necessary to fund WQA's operations.

The WQA is holding its first Budget Workshop today. A second Budget Workshop will be held at the WQA Board Meeting on April 22, 2026. Any changes or comments received after the April 22, 2026 Budget Workshop will be reviewed at the May 13, 2026 Administrative/Finance Committee meeting, with any updates incorporated into the budget and presented to the Board at the regular WQA Board Meeting on May 20, 2026. Staff anticipates that the budget will be adopted on May 20, 2026.

### Recommendations / Proposed Actions

- This draft budget is for discussion purposes only. Any changes or comments received will be considered for the next budget workshop on April 22, 2026.

### PROJECTS

#### 1. Project Budget Line Items

Each of the following headings are included on each project budget and are defined as follows:

##### 1a. Legal/Mediation/Litigation

This item includes the professional services required to negotiate, develop agreements, and/or litigate. The budget costs reflect anticipated professional services by our general and/or specialized counsel.

##### 1b. Government Relations / Community Relations

Government Relations: These costs reflect the fees associated with efforts in Washington D.C. and Sacramento to find outside sources of funding for cleanup projects. The fees have been proportionately allocated to the related projects requiring outside funding. The allocation rate is based upon funding provided to activities in the operable units. The rate is reviewed on an annual basis and adjusted accordingly. The rates for FY 26/27 are shown below.

Community Relations: The WQA disseminates information to a large audience throughout the year with the use of approximately eight to ten full-color inserts exclusive to the WQA, as well as e-mail "blasts" to approximately 60,000 readers. These are issued in conjunction with Earth Day, Civic Leadership, Water Awareness and other special sections or events. The WQA has also developed a comprehensive social media communications plan that capitalizes on social media's increasing influence to communicate its goal to the general public. In addition, the WQA produces interactive video interviews and project site tours to highlight groundwater cleanup efforts, provide behind-the-scenes insight into water treatment activities, and enhance public understanding of the Authority's work. The fees are allocated proportionately among the 42 projects that are included in the budget.

	<u>Government</u>	<u>Community</u>
	<u>Relations</u>	<u>Relations</u>
Baldwin Park Operable Unit - BPOU Committee	40.7%	16.7%
Baldwin Park Operable Unit - Non-Committee	14.0%	11.9%
El Monte Operable Unit	5.1%	11.9%
So. El Monte Operable Unit	14.2%	26.2%
Puente Valley Operable Unit	4.8%	11.9%
Area Three Operable Unit	2.0%	7.1%
Other Projects	<u>19.2%</u>	<u>14.3%</u>
TOTAL	<u>100.0%</u>	<u>100.0%</u>

## ANNOTATIONS AND PROJECT DESCRIPTIONS

---

### 1. Project Budget Line Items (continued)

#### 1c. Treatment and Remediation (T & R) / Administration Costs/Grants

Costs on this line item are associated with projects that are owned and operated by either the WQA, Responsible Parties (RPs), or Water Producers and reflect the expenses necessary to maintain and operate a treatment system or the costs associated with administering outside funding and grants.

### 2. OTHER PROJECTS

#### ARCADIA LONGDEN AND LIVE OAK TREATMENT PLANTS (See page 3)

The City of Arcadia operates two treatment facilities. The Longden Treatment Plant utilizes air-stripping treatment technology for VOCs with capacity of 4,500 gpm. The Live Oak Treatment Plant utilizes LPGAC treatment technology for PFAS with a capacity of 3,000 gpm. The treated water is conveyed into Arcadia's existing distribution system. For FYs 18/19, 19/20, 20/21, 21/22, 22/23, 23/24, 24/25, 25/26 and 26/27, the treatment and remediation costs are funded by the SWRCB DFA Proposition 68 grant funds.

#### MONROVIA MYRTLE WELLFIELD TREATMENT (See page 4)

The City of Monrovia operates two VOC treatment facilities at its Myrtle Wellfield. Tower 1 and 2 Treatment Plant utilizes air-stripping treatment technology with a capacity of 3,600 gpm. Tower 3 and 4 Treatment Plant utilizes air-stripping treatment technology with a capacity of 4,000 gpm. The treated water is conveyed into Monrovia's existing distribution system. For FYs 18/19, 19/20, 20/21, 21/22, 22/23, 23/24, 24/25, 25/26 and 26/27, the treatment and remediation costs are funded by the SWRCB DFA Proposition 68 grant funds.

#### SAN GABRIEL VALLEY WATER COMPANY - PLANT 11 (See page 5)

The WQA Board authorized the use of Restoration funds in prior years to offset a portion of SGVWC's treatment and remediation costs for Plant 11. The federal funds for Plant 11 were utilized in FY 9/10; no federal funds have been allocated since that date. Plant 11 continues to operate with costs currently funded by SGVWC and Proposition 68 funds. For FYs 18/19, 19/20, 21/22, 21/22, 22/23, 23/24, 24/25, 25/26 and 26/27, treatment and remediation costs are funded by the SWRCB DFA Proposition 68 grant funds.

SGVWC is constructing a new PFAS treatment facility utilizing ion exchange technology with a capacity of 5,000 gpm. The overall cost is projected at \$7.2M. During the FY 22/23, the WQA Board awarded \$2.0M of Restoration (FFPA) funds to partially offset the cost of construction. A portion of the award was paid in FYs 24/25 and 25/26 with the remainder to be paid in FY 26/27.

# SAN GABRIEL BASIN WATER QUALITY AUTHORITY

OPERATING AND PROJECT EXPENSE BUDGET  
FISCAL YEAR ENDING JUNE 30, 2027

## ANNOTATIONS AND PROJECT DESCRIPTIONS

---

### **SAN GABRIEL VALLEY WATER COMPANY - PLANT 1 PFAS (See page 6)**

The project is located in the City of El Monte and involves the construction of a PFAS treatment facility utilizing ion exchange technology. The proposed treatment facility will be able to treat any combination of Plant 1 Wells with a design capacity of 5,000 gpm. The overall cost is projected at \$6.65M. During the FY 22/23, the WQA Board allocated \$1.025M through the FFPA process. Although the treatment facility is still under construction, as of FY 25/26 the Restoration funds have been fully paid out to San Gabriel Valley Water Company.

### **SUBURBAN WATER COMPANY - PLANT 201 PFAS Treatment Plant Phase 1(See page 7)**

Suburban Water Company is involved in the design and construction of a 10,000 gpm ion exchange equipment for the removal of PFAS contamination. The treated water will conveyed into Suburban Water Systems existing distribution infrastructure. The WQA Board has allocated FFPA funds to partially offset the cost of construction.

### **WHITTIER NARROWS OPERABLE UNIT (WNOU) (See page 8)**

The WQA is assisting the U.S. Environmental Protection Agency (EPA) and the Department of Toxic Substances Control (DTSC) in developing a long-term plan to guarantee the continued operations of the WNOU remedy and to ensure that the remedy is performing as required by the WNOU Record of Decision (ROD). The plan currently calls for the San Gabriel Valley Water Company (SGVWC) to assume operations of the treatment plant. In order for SGVWC to assume operations capital upgrades are required. The upgrades include the construction of an onsite reservoir, construction of blending controls and a 3,000 gpm booster station as well as an updated pump station and disinfection equipment along with the drilling of a deep extraction well. In addition, a 7,000 linear foot blending pipeline is necessary to bring needed blend water from SGVWC's existing distribution system to facilitate long term operation of the treatment facility. The costs associated with the capital upgrades total approximately \$25M and are being funded by an agreement between EPA, DTSC and state funding through Proposition 1, with a preliminary Proposition 1 award of up to \$7.1M and an EPA grant of \$6M. Any costs associated with WQA involvement are currently being funded by WQA.

OPERATING AND PROJECT EXPENSE BUDGET  
FISCAL YEAR ENDING JUNE 30, 2027

## ANNOTATIONS AND PROJECT DESCRIPTIONS

---

### 3. **BALDWIN PARK AREA OPERABLE UNIT - LPVCWD (See page 12)**

The 2,500 gpm groundwater treatment project was constructed in 2000 for the La Puente Valley County Water District (LPVCWD). The plant utilizes air stripping, ion exchange and ultraviolet light to treat VOCs, Perchlorate, n-nitrosodimethylamine (NDMA) and 1,4-Dioxane. The treatment and remediation costs for the project are funded through the Baldwin Park Operable Unit (BPOU) Project Agreement. In addition, LPVCWD tested waste brine destruction methods resulting from the operation of the ion exchange treatment technology. The regenerable ion exchange treatment equipment was subsequently replaced with more efficient single pass ion exchange treatment equipment thereby eliminating all waste brine discharges. In addition to the ion exchange treatment equipment, LPVCWD constructed a new onsite production well. The costs for the completion of the ion exchange treatment equipment and the new well were reflected in the FY09/10 budget and were funded through the BPOU Project Agreement, a USBR Title XVI award, and Restoration funds approved by the Board. The FY 26/27 budget includes the subsequent treatment and remediation costs that are being funded through the BPOU Project Agreement.

Additionally, LPVCD is constructing a Nitrate Treatment Facility. The project involves the design and construction of a 1,500 gpm regenerable ion exchange equipment for the removal of nitrate contamination. The treated water slip stream of water is re-blended upstream of additional required treatment. The overall cost is projected at \$2.8M. During the FY 22/23 the WQA Board awarded \$1.275M through the FFPA process which was paid to LPVCWD during FY 22/23.

### 4. **BALDWIN PARK AREA OPERABLE UNIT - PLANT B6 (See page 13)**

The 7,800 gpm groundwater treatment project at San Gabriel Valley Water Company's (SGVWC) existing B6 well field is currently operating under its amended water supply permit. The project removes VOCs, Perchlorate, NDMA and 1,4-Dioxane from the groundwater with a combination of treatment technologies including air stripping and single pass ion exchange treatment equipment. The project also includes four extraction wells at two extraction locations near the southwestern edge of the BPOU. In addition, SGVWC was required by the DPH to construct an additional fixed bed ion exchange treatment system for the removal of nitrates. The second round of funding from Proposition 84, Section 75025 provided funding for the nitrate system. SGVWC is also installing an advanced UVFlex modular treatment system for 1,4-dioxane and NDMA at an estimated cost of \$2.2M. This system would reduce the amount of energy necessary to operate and optimize the treatment of contaminants. Proposition 1 funding of a portion of the UVFlex project was approved. In FY 22/23, the WQA Board approved an FFPA award of \$1.29M for this project, which has been fully paid as of FY 24/25. In FY 24/25, the WQA Board approved an FFPA award of \$1.0M for the replacement of 4 existing Airstripping Towers with 2 new Airstripping Towers with a capacity of 7,800 gpm. This project is still ongoing. The FY 26/27 budget also includes treatment and remediation costs that are funded through the BPOU Project Agreement.

# SAN GABRIEL BASIN WATER QUALITY AUTHORITY

OPERATING AND PROJECT EXPENSE BUDGET  
FISCAL YEAR ENDING JUNE 30, 2027

## ANNOTATIONS AND PROJECT DESCRIPTIONS

---

**5. BALDWIN PARK AREA OPERABLE UNIT - CDWC Well 14 (See page 14)**

California Domestic Water Company (CDWC) has constructed VOC, Perchlorate and NDMA treatment facilities at their Well No. 14. While the project is not part of the EPA ROD, it is funded as part of the comprehensive BPOU Project Agreement that has been endorsed by the EPA. In FY09/10 CDWC constructed an extraction well to replace existing Well No. 14 due to sub-surface failure. The cost of the constructing a pipeline between the CDWC Bassett Well Field and SGVWC's Plant B5 was also funded through the BPOU Project Agreement. The FY 26/27 budget includes treatment and remediation costs, which are funded through the BPOU Project Agreement.

**6. BALDWIN PARK AREA OPERABLE UNIT - CDWC Well 8 PFAS (See page 15)**

CDWC is designing and constructing a 3,000 gpm ion exchange resin treatment system for the removal of PFAS contamination. The treated water will be conveyed into CDWC's existing distribution infrastructure. The cost of the facility is projected to be \$4.7M. During FY 22/23, the WQA Board allocated an FFPA award of \$2.6M award for the project. The award has been fully paid as of FY 24/25.

**7. BALDWIN PARK AREA OPERABLE UNIT - PLANT B5 (See page 16)**

The 7,800 gpm treatment system at SGVWC's existing B5 well field and extraction well on site is located at the southern edge of the BPOU and is part of the EPA's ROD and the BPOU Project Agreement. The project treats Perchlorate, NDMA, 1,4-Dioxane and VOCs. The B5 treatment facility started operations in FY 08/09 with all associated costs funded through the BPOU Project Agreement. The FY 26/27 budget includes treatment and remediation costs that are being funded through the BPOU Project Agreement.

SGVWC has also replaced four Micron Filter Vessels at an estimated cost of \$535K. In FY 22/23, the WQA Board approved an FFPA award of \$345K for this project, of which \$64K was paid in FY 22/23 and the balance of \$281K was paid in FY 23/24.

# SAN GABRIEL BASIN WATER QUALITY AUTHORITY

OPERATING AND PROJECT EXPENSE BUDGET  
FISCAL YEAR ENDING JUNE 30, 2027

## ANNOTATIONS AND PROJECT DESCRIPTIONS

---

### 8. **BALDWIN PARK AREA OPERABLE UNIT - VCWD SUB-AREA 1 (See page 17)**

The 7,800 gpm groundwater treatment system at Valley County Water District's (VCWD) Arrow/Lante well field removes Perchlorate, NDMA, 1,4-Dioxane and VOCs utilizing treatment systems similar to those used in the B6 project. The project includes two extraction wells (SA1-1 and SA1-2) and a treated water pipeline to Suburban Water Systems' (SWS) existing distribution system. VCWD has replaced its existing regenerable ion exchange treatment equipment with the more efficient single pass ion exchange treatment equipment. The FY 20/21 budget included costs for the ongoing rehabilitation of a groundwater extraction well and a liquid phase granular activated quench system. The WQA Board allocated Restoration funds to partially offset the cost of design and construction of these systems. Additionally, the second round of funding from Proposition 84, Section 75025 provided funding for bypass piping to address nitrate contamination. The FY 26/27 budget includes ongoing treatment and remediation costs that are being funded through the BPOU Project Agreement.

VCWD is upgrading and rehabbing the Lante Plant at an estimated cost of \$2.26M. In FY 22/23, the WQA Board approved an FFPA award of \$1.16M for this project, of which \$91K was paid in FY 22/23, \$281K was paid in FY 23/24, and \$446K was paid in FY24/25. The WQA Board approved an additional FFPA award of \$300K which was paid in full FY 25/26.

### 9. **BALDWIN PARK AREA OPERABLE UNIT - SWS Plants (See page 18)**

SWS has constructed two new production wells, one at its Plant 121 and the other at its Plant 142, to replace the production lost at its Plant 139. The project included a pipeline that connected Plant 121 with an adjacent service area that includes their Plant 140 NDMA treatment facility and the construction of a third production well Plant 151. The project was funded by the Project Agreement. The FY26/27 budget includes ongoing treatment and remediation costs that are being funded through the BPOU Project Agreement.

### 10. **BALDWIN PARK AREA OPERABLE UNIT - BALDWIN WELLS PUMPING PLANT (See page 19)**

This project is located at Covina Valley Water Company's (CVWC) Baldwin Park Pumping Plant where CVWC constructed a 6,600 gpm treatment system utilizing fixed bed ion exchange treatment technology for the removal of perchlorate from onsite wells 1, 2 and 3. The project is not part of the EPA ROD, therefore it was not funded through the BPOU Project Agreement. In prior years the WQA Board allocated Restoration funds to partially offset the cost of design and construction. The second round of funding from Proposition 84, Section 75025 also provided funds for the project.

CVWC is also designing and constructing a 6,600 gpm ion exchange treatment system for the removal of PFAS contamination. The treated water will be conveyed into Suburban Water System's existing distribution infrastructure. The overall cost is projected at \$2.5M. During FY 22/23, the WQA Board awarded \$1.0M through the FFPA process, of which \$505K was paid in FY 23/24, with the remainder of the funding paid in FY 25/26.

# SAN GABRIEL BASIN WATER QUALITY AUTHORITY

OPERATING AND PROJECT EXPENSE BUDGET  
FISCAL YEAR ENDING JUNE 30, 2027

## ANNOTATIONS AND PROJECT DESCRIPTIONS

---

**11. BALDWIN PARK AREA OPERABLE UNIT - VCWD Maine & Nixon Treatment (see page 20)**

Valley County Water District operates two VOC treatment facilities. Maine Treatment Facility utilizes LGAC treatment technology with a capacity of 3,450 gpm. Nixon Treatment Facility utilizes LGAC treatment technology with a capacity of 6,250 gpm. For FYs 18/19, 19/20, 20/21, 21/22, 22/23, 23/24, 24/25, 25/26 and 26/27 the treatment and remediation costs are funded by the SWRCB DFA Proposition 68 grant funds.

**12. BALDWIN PARK AREA OPERABLE UNIT - AZUSA WATER - ASPAN (see page 21)**

The project is located in the City of Azusa and involves the construction of a VOC treatment facility utilizing liquid phase granular activated carbon technology. The proposed treatment will treat Aspan Well with a design capacity of 1,800 gpm. The project cost is projected at \$14.1M. The WQA Board has allocated Restoration funds of \$1.775M to partially offset the cost of construction.

**13. BALDWIN PARK AREA OPERABLE UNIT - REGIONAL GROUNDWATER PROJECT (see page 22)**

The proposed project, developed by Three Valleys Municipal Water District (TVMWD), will rehabilitate two of Glendora's existing wells located in the City of Irwindale, construct wellhead treatment at the site and construct potable water pipelines to provide sustainable groundwater to the City. The proposed treatment facility will have a design capacity of 4,000 gpm. The WQA Board has allocated Restoration funds to partially offset the cost of construction.

**14. BALDWIN PARK AREA OPERABLE UNIT - VCWD MORADA TREATMENT(see page 23)**

The project is located in the City of Irwindale and involves the construction of a groundwater treatment facility utilizing best available technology. The proposed treatment facility will have a design capacity of 1,500 gpm. The project cost is estimated at \$2.2M.

**15. EL MONTE AREA OPERABLE UNIT - Encinita (See page 25)**

This VOC treatment project enables the Golden State Water Company (GSWC) to treat all of the 2,250 gpm available at the Encinita Plant. Funding for the project came from a variety of sources including federal funding. The WQA Board had allocated Restoration funds to offset treatment and remediation costs, which have been utilized in full as of FY 11/12. For FYs 18/19, 19/20, 20/21, 21/22, 22/23, 23/24, 24/25, 25/26 and 26/27 the treatment and remediation costs are funded by the SWRCB DFA Proposition 68 grant funds.

# SAN GABRIEL BASIN WATER QUALITY AUTHORITY

OPERATING AND PROJECT EXPENSE BUDGET  
FISCAL YEAR ENDING JUNE 30, 2027

## ANNOTATIONS AND PROJECT DESCRIPTIONS

---

**16. EL MONTE AREA OPERABLE UNIT - Westside Shallow Remedy (See page 26)**

In FY 06/07 the Westside Performing Settling Defendants (WSPSD) constructed additional monitoring wells required by EPA to fully characterize the extent of contamination in the western portion of the El Monte Operable Unit (EMOU). In FY 07/08 the WSPSD began construction of VOC treatment facilities and conveyance pipelines. In the event that emergent chemical contamination is found appropriate treatment will be added. The project work meets the west side shallow zone remediation requirements of EPA's EMOU ROD. The WQA Board allocated Title XVI funds and Restoration Funds to offset the cost of construction of the VOC facilities and pipelines and the funds have been fully utilized. Construction was completed in FY 12/13 and the project is now fully operational. Treatment and remediation costs are being funded by the WSPSD. However, recent data indicates the need to construct additional advanced oxidation treatment for destruction of 1,4-dioxane with the additional construction costs being funded by the WSPSD. WSPSD has constructed seven additional shallow zone extraction wells due to the lowering groundwater table, with costs being funded by the WSPSD.

The WSPSD is constructing new groundwater conveyance piping for the additional seven wells to the existing treatment facility along with necessary electrical upgrades and controls. The proposed capital improvements are estimated to be \$8.0M. The WQA Board has allocated FFPA funds of \$1.0M to partially offset the cost of construction which have been paid in FY 23/24.

**17. EL MONTE AREA OPERABLE UNIT - Eastside Shallow Remedy (See page 27)**

During FY 07/08, the Eastside Performing Settling Defendants (ESPSD) began construction of extraction wells, re-injection wells, conveyance pipelines and a VOC treatment facility. In the event that emergent chemical contamination is found, appropriate treatment will be added. The work meets the east side shallow zone remediation requirements of EPA's EMOU ROD. The WQA Board also allocated Title XVI funds and Restoration funds to offset the cost of construction. The FY 15/16 budget included capital costs associated with the project construction and staff time associated with project coordination and processing federal awards. The Title XVI and Restoration funds have been fully utilized as of FY 15/16, and no further funding has been provided as of FY 21/22. The construction has been completed and the project is now operational. Treatment and remediation costs are being funded by the ESPSD.

OPERATING AND PROJECT EXPENSE BUDGET  
FISCAL YEAR ENDING JUNE 30, 2027

## ANNOTATIONS AND PROJECT DESCRIPTIONS

---

**18. EL MONTE AREA OPERABLE UNIT - Southeast Deep Remedy- City of El Monte Wells 14, 15, & 16 (See page 28)**

The ESPSD and the City of El Monte (CEM) entered into an agreement to construct three new extraction wells, necessary conveyance pipelines and the construction of a centralized VOC treatment facility. The CEM operates the treatment facility and uses all of the treated water produced for domestic supply. This project satisfies the east side deep zone remediation requirements of EPA's EMOU ROD. The WQA Board allocated Restoration funds to offset the cost of construction, with construction starting in FY 07/08. The FY 15/16 budget included capital costs associated with the project construction. The construction has been completed and the project is now operational. Although certain treatment and remediation costs are funded by the ESPSD, by agreement, there are certain costs not funded by the ESPSD. For FYs 18/19, 19/20, 20/21, 21/22, 22/23, 23/24, 24/25, 25/26 and 26/27 those treatment and remediation costs are being partially funded by SWRCB DFA Proposition 68 funds.

**19. EL MONTE AREA OPERABLE UNIT - City of El Monte Wells 2A, 10 and 12 (See page 29)**

The CEM has constructed VOC treatment systems at its well sites for Wells 2, 10 and 12. The WQA Board allocated Restoration funds to partially offset the cost of treatment and remediation, which had been fully utilized as of FY 15/16. No additional funding had been provided, therefore treatment and remediation costs were funded entirely by the CEM. For FYs 18/19, 19/20, 20/21, 21/22, 22/23, 23/24, 24/25, 25/26 and 26/27 the treatment and remediation costs are being funded by the SWRCB DFA Proposition 68 grant funds.

**20. SO. EL MONTE AREA OPERABLE UNIT - Monterey Park Wells 1,3,10&Fern(See page 32)**

CMP operates a non-remedy VOC treatment plant for Wells 1, 3, 10 and Fern located at the Delta Plant. The treatment and remediation costs for FYs 21/22, 22/23, 23/24, 24/25, 25/26 and 26/27 are funded by SWRCB DFA Proposition 68 funds.

**21. SO. EL MONTE AREA OPERABLE UNIT - Monterey Park Centralized Groundwater Treatment System and Monterey Park Wells (See page 31)**

The CMP has constructed a centralized groundwater treatment system (CGTS) at its Delta Plant to replace the individual remedy wellhead systems. The CGT removes VOCs, 1,4-dioxane and PFOS and enables the City to maximize production from its three remedy wells, Wells 5, 12 and 15. The project was partially funded by a Proposition 84 grant and became operational in November 2023. It has replaced the antiquated VOC wellhead treatment facilities at Well 5, Well 12 and Well 15. In FY 24/25, the project was transitioned from EPA to DTSC, with the treatment and remediation costs being funded by DTSC. The FY 26/27 budget costs are funded by the DTSC agreement.

# SAN GABRIEL BASIN WATER QUALITY AUTHORITY

OPERATING AND PROJECT EXPENSE BUDGET  
FISCAL YEAR ENDING JUNE 30, 2027

## ANNOTATIONS AND PROJECT DESCRIPTIONS

---

**22. SO. EL MONTE AREA OPERABLE UNIT - SGVWC Plant 8 (See page 33)**

SGVWC started the design process for additional treatment consisting of ion exchange for perchlorate contamination and advanced oxidation of 1,4-dioxane destruction; the additional treatment will be necessary if concentrations exceed 50% of the maximum contaminate level. The WQA Board allocated the use of federal funds to offset the cost of SGVWC's design. In FY 18/19 SGVWC began construction of an advanced oxidation treatment system for 1,4-dioxane contamination - the WQA Board also allocated federal funds to offset a portion of the design costs. These funds were awarded to SGVWC in FY 18/19. For subsequent fiscal years, funding for the treatment and remediation costs for VOC treatment at Plant 8 was provided by the EPA Cooperative Agreement. In FY 24/25, the project was transitioned from EPA to DTSC with the treatment and remediation costs being funded by DTSC. The FY 26/27 budget costs are funded by the DTSC agreement.

**23. SO. EL MONTE AREA OPERABLE UNIT - GSWC SG 1 & 2 Wells (See page 34)**

In prior years the Golden State Water Company (GSWC) retrofitted two of its existing six carbon vessels for ion exchange treatment of Perchlorate, and subsequently reversed the two vessels back into VOC treatment. The WQA Board had allocated federal funds to offset a portion of GSWC's treatment and remediation costs of the VOC and the temporary Perchlorate treatment systems - the funds were completely utilized as of FY 14/15. For subsequent fiscal years through FY 23/24, remediation costs associated with the VOC treatment for Wells SG1 and SG2 are provided by the EPA Cooperative Agreement. In FY 24/25, the project is being transitioned to DTSC with the costs being funded by DTSC. The FY 26/27 budget costs are funded by the DTSC agreement.

**24. SO. EL MONTE AREA OPERABLE UNIT - SGVWC Plant G4 (See page 35)**

SGVWC constructed a VOC treatment facility at its existing Plant G4. The WQA Board allocated federal funds to offset a portion of the treatment and remediation costs associated with the VOC treatment, which were completely utilized as of FY 10/11. For FYs 21/22, 22/23, 23/24, 24/25, 25/26 and 26/27 the treatment and remediation costs are funded by SWRCB DFA Proposition 68 funds.

**25. SO. EL MONTE OPERABLE UNIT - Whitmore Treatment Facility (See pages 36 & 37)**

During FY 07/08, the WQA constructed a treatment facility utilizing UV oxidation and LPGAC treatment technologies for the removal of 1,4-Dioxane and VOCs. The WQA received a grant from the State of California to offset the costs of construction and a portion of treatment and remediation which provided funding through December 2012. In December 2012, the State approved an additional five years of funding for the construction of a new extraction well and to offset costs of treatment and remediation. The State funding was fully expended within the first quarter of FY 18/19, at which time the cost of operating the treatment facility was being funded entirely by the WQA. For FY 21/22, 22/23, 23/24, 24/25, 25/26 and 26/27 the budget includes SWRCB DFA Proposition 68 funds that have been awarded to cover treatment and remediation costs.

The WQA investigated the contamination in the shallow aquifer surrounding the Whitmore site, and using hydropunch technology the WQA gained additional data to enhance the extraction at the Whitmore site. The cost of this project was partially funded by a Proposition 1 grant with the remainder of the funding being provided by the WQA. Costs for this project were included in the budgets for FYs 21/22 and 22/23, with the investigation being completed in FY 22/23.

As a result of the expanded site investigation surrounding the Whitmore site, WQA is in the process of enhancing its effectiveness. The project consists of the installation of 6 monitoring wells, 5 new dual completion extraction wells and 2 new single completion extraction wells along with associated pipelines to convey extracted water to the existing treatment facility. Costs for this project are being funded by a grant from the SWRCB Proposition 1 Round 3.

**26. SO. EL MONTE OPERABLE UNIT - Regional Site Investigation (See page 38)**

The WQA is involved in a collaborative effort with the Los Angeles Regional Water Quality Control Board, the SWRCB Department of Financial Assistance, and the DTSC to facilitate the investigation and cleanup of contamination sources. The WQA received a planning grant to be used to perform remedial Phase 1 and Phase 2-type investigations of soil, soil gas, and groundwater beneath high priority sites within the Basin. The cost of this project is partially funded by a Proposition 1 grant with the remainder of the funding provided by the WQA. The WQA Board has also approved an FFPA award to cover match requirements and certain of the project costs. The project has been completed at the end of FY24/25.

**27. SO. EL MONTE AREA OPERABLE UNIT - GSWC Garvey Plant (See page 39)**

Golden State Water Company operates a VOC treatment facility at its Garvey wellsite. The Garvey treatment facility utilizes LGAC treatment technology with a capacity of 1,000 gpm. The treated water is conveyed into GSWC's distribution system. The costs reflected in FYs 18/19, 19/20, 20/21, 21/22, 22/23, 23/24, 24/25, 25/26 and 26/27 are for treatment and remediation costs funded by SWRCB DFA Proposition 68 funds.

## ANNOTATIONS AND PROJECT DESCRIPTIONS

---

**28. PUENTE VALLEY AREA OPERABLE UNIT - SGVWC Plant B11 (See page 41)**

The WQA Board authorized the use of federal funds to offset a portion of SGVWC's treatment and remediation costs for Plant B11. The federal funds for Plant B11 were fully utilized in FY 10/11. No federal funds have been allocated in subsequent years. Plant B11 continues to operate with costs currently funded by RPs.

**29. PUENTE VALLEY AREA OPERABLE UNIT - Intermediate Zone Remedy (See page 42)**

In FY 06/07, the PVOU Responsible Party (Northrop Grumman), began construction on the intermediate zone remedy for the Puente Valley Operable Unit (PVOU). Subsequently, the project was relocated and completely redesigned, with construction on the redesigned facility starting in FY 18/19. The project consists of extraction wells, conveyance pipelines, VOC treatment equipment, ion exchange treatment equipment, UV oxidation treatment equipment and reverse osmosis treatment equipment. It is located on a property acquired by Northrop Grumman. Previously, the WQA Board allocated Restoration funds to offset a portion of the construction costs which had been fully utilized as of FY 21/22. Additionally, in FY 22/23, the WQA Board allocated \$1.0M to the project through the FFPA process, which is included in the FY 26/27 budgeted expenses. The project is currently undergoing 97-005 testing prior being awarded its NPDES permit.

**30. PUENTE VALLEY AREA OPERABLE UNIT - Shallow Zone South Remedy (See page 43)**

The PVOU Shallow Zone South Remedy located in the City of Industry is being constructed by Northrop Grumman. The project consists of extraction wells, conveyance piping, VOC treatment technology, ion exchange treatment technology, UV oxidation treatment technology and reverse osmosis treatment technology. It has a design treatment capacity of 300 gpm. Treated groundwater will be discharged to surface water via a NPDES permit.

**31. PUENTE VALLEY AREA OPERABLE UNIT - Shallow Zone North Remedy (See page 44)**

This project is being implemented by Carrier Corporation to satisfy its responsibility for the PVOU shallow zone north remedy. The project consists of extraction wells, raw water pipelines, centralized treatment facility, treated water pipeline and re-injection wells. The treatment facility will have a capacity of 1,560 gpm and will treat for VOCs and emergent chemicals. Costs are not included for FY 26/27 as construction is not expected to start during the next fiscal year.

**32. PUENTE VALLEY AREA OPERABLE UNIT - SGVWC - Plant B24 (See page 45)**

The project is located in the City of Industry and involves the construction of a VOC treatment facility utilizing air-stripping technology. The proposed treatment facility will treat Wells B24A and B24B with a design capacity of 5,000 gpm. The WQA Board has allocated Restoration funds to partially offset the cost of construction.

**33. AREA THREE OPERABLE UNIT - City of Alhambra (See page 46)**

The City of Alhambra's ("Alhambra") Phase I of its pump and treat program consists of a 1,600 gpm air stripping plant at Well 7. Phase II consists of a centralized treatment plant for the remediation of VOCs, including 1,2,3-TCP. The treatment plant utilizes LPGAC, was designed for a capacity of 5,400 gpm and accepts flow from City Wells Nos. 8, 11, and 12. The treated water is then blended with the treated water from Well No. 7 and conveyed to Alhambra's distribution system. The WQA Board allocated Restoration funds to this project to partially reimburse Alhambra for the Phase I and Phase II costs and to offset a portion of the treatment and remediation costs. As of FY 13/14, all federal funds had been fully utilized by Alhambra. No federal funds have been allocated for FY 23/24. Costs for treatment and remediation have previously been funded by the City of Alhambra. For FYs 18/19, 19/20, 20/21, 21/22, 22/23, 23/24, 24/25, 25/26 and 26/27 treatment and remediation costs are funded by the SWRCB DFA Proposition 68 grant funds.

**34. CITY OF SOUTH PASADENA - WILSON WELLS TREATMENT (See page 47)**

The project is located in the City of San Gabriel at the Wilson Reservoir and involves the construction of a 1,2,3-trichloropropane (TCP) treatment facility using granular activated treatment for the removal of TCP with a plant capacity of 3,000 gpm. The treated water is conveyed into South Pasadena's existing distribution system. The WQA Board allocated Restoration funds to partially offset the cost of construction. For FYs 18/19, 19/20, 20/21, 21/22, 22/23, 23/24, 24/25, 25/26 and 26/27 treatment and remediation costs are funded by the SWRCB DFA Proposition 68 grant funds.

**35. CITY OF SOUTH PASADENA - GRAVES TREATMENT (See page 48)**

The project is located in the City of San Marino and involves the construction of a VOC treatment technology utilizing granular activated carbon treatment and an ion exchange treatment technology for nitrate treatment. The treatment facility will have a capacity of 1,000 gpm. The project has an estimated cost of \$10.7M. The WQA Board has allocated Restoration funds of \$500K to partially offset the cost of construction.

**36. SWRCB DFA Proposition 68 Administrative Costs (See page 49)**

The WQA received two SWRCB DFA Proposition 68 grants to cover treatment and remediation costs for ten (10) Water Entities for a total of twenty-three (23) treatment facilities located in the San Gabriel Basin. The grants are intended to reimburse the Water Entities for eligible treatment and remediation costs incurred between the period of July 1, 2018 through January 31, 2027. Included in the Administrative Costs for FYs 22/23, 23/24, 24/25, 25/26 and 26/27 are WQA's costs related to the administration of the two agreements that are funded by SWRCB DFA Proposition 68 funds.

### OPERATING EXPENSE BUDGET (See pages 50 - 51)

#### **41. Operating Expenses**

##### **41a. Office Facilities**

Office facilities includes the monthly lease expense and any related utility costs.

##### **41b. Equipment O&M-Computer Systems**

This line item reflects costs associated with maintaining computers and related equipment, the network and its backup system, as well as an internet connection line. Although certain maintenance is performed in-house, the WQA does require the expertise of professional computer consultants. The cost of the consultants are included in the cost category of Outside Consultants: Computer (see 41c. below).

##### **41c. Outside Consultants: Computer**

The WQA has engaged an information systems consulting firm to provide for consistent and reliable computer support, with services including maintaining and monitoring servers, workstations and network security. The FY 26/27 budget includes costs related to the consulting firm.

##### **41d. Working Group Activities**

During FY 17/18, the WQA began participating in a working group, CEPRD, to assist in the development of a guidance manual for the SWRCB Department of Drinking Water (DDW) Policy 97-005 process. The guidance manual was completed during FY 20/21 and is now available on the DDW website. The project continued with the development of training materials for usage of the guidance manual and policies regarding Chemicals of Emerging Concern (CECs). WQA is currently working with CEPRD to collaborate on emerging contaminant issues with policy makers and the State Water Resources Control Board Division of Drinking Water. The coalition includes Orange County Water District and the Los Angeles Department of Water and Power among others.

##### **41e. Public Information**

Public information costs include basin-wide informational workshops, the issuance of an annual report based on the 406 plan as well as all required public notices that are published in local and regional newspapers which are not attributable to projects. The WQA co-hosts an annual informational workshop jointly with selected other water districts, and hosts several mini-workshops throughout the year. The WQA is also participates in youth outreach programs.

OPERATING AND PROJECT EXPENSE BUDGET  
FISCAL YEAR ENDING JUNE 30, 2027

## ANNOTATIONS AND PROJECT DESCRIPTIONS

---

### **41f. General Outside Services**

The budget for FY 26/27 includes the cost of engaging a professional organization to scan additional documents for electronic storage - these documents were not included in the original project in which the bulk of the WQA's documents were scanned.

### **41g. Travel, Meetings and Conference Expenses**

The expenses in this category include mileage reimbursements, airfare, car rental, hotel and out-of-town meals for authorized meetings, such as ACWA, EPA, meetings with legislators in Sacramento and Washington D.C and meetings for contract negotiations, as well as conference registration fees (i.e., ACWA, NGWA) and costs to attend and/or host meetings related to WQA activities.

The total budget is allocated between WQA Board Members and WQA Employees.

#### Board Member Travel, Meeting & Conference

The FY 26/27 budget projects the amount of WQA-paid expenses that each Board Member incurs up to a maximum of \$6,000 per Board Member.

#### Employee Travel, Meeting & Conference

This budget category includes staff costs and other costs to attend and/or host meetings related to the WQA activities.

### **41h. Salaries and Benefits**

The WQA currently has seven full-time employees for FY 26/27. Employee equivalents are computed based upon the fraction of the fiscal year that each employee worked in the categories listed below and on the next page.

# SAN GABRIEL BASIN WATER QUALITY AUTHORITY

OPERATING AND PROJECT EXPENSE BUDGET  
FISCAL YEAR ENDING JUNE 30, 2027

## ANNOTATIONS AND PROJECT DESCRIPTIONS

---

### 41. Operating Expenses (continued)

#### Category 1: Salaries Allocated by Individual Record Keeping Based on Actual Time to Projects

##### 41i. Salaries and Benefits Paid by Projects

The WQA currently utilizes an internal allocation procedure whereby salaries for technical positions (see Category 1 below) are allocated to projects based on individual record keeping and actual time spent on projects.

Salaries for administrative positions (see Category 2 below) are allocated proportionately to both projects and general administration. The allocation rates are reviewed annually and adjusted based on the projected activities in the operable units. The allocation method is based on level of effort expended for each operable unit.

The categories below reflect the FY 26/27 allocations.

*Applicable Positions:* Executive Director, Assistant Executive Director, Project Resource Manager, Director of Communications and Board Relations and Senior Administrative Assistant/Office Coordinator.

#### Category 2: Salaries Allocated by Proportionate Share to Projects and General Administration

*2026/2027 Computation:* 50.0% ADMIN; 12.8% BPOU - Committee; 1.3% BPOU Non-committee; 3.2% EMOU; 22.5% SEMOU; 3.2% PVOU; 3.2% ATOU and 3.8% Other Projects.

*Applicable Positions:* Director of Finance and Accounting Specialist.

### 42. Operating Revenues

#### 42a. Interest Income

This line item reflects investment interest earned from the Local Agency Investment Fund (LAIF) and interest income earned from bank accounts. For the current year projected interest income is based on historical interest earnings, projected interest rates, and the projected timing of cash receipts and disbursements. The budgeted interest income for FY 26/27 is estimated based on an average investment balance of \$18.0M and includes assumptions about the timing of cash receipts and disbursements. The majority of the funds held by WQA are to be used for reimbursement of costs through FFPA awards, payment of the matching costs for SWCRB grants and costs related to other agreements.

### 43. Pumping Right Assessments

The Pumping Right Assessment as established for the FY 26/27 Budget is \$12.00 per acre-foot of prescriptive pumping rights.

Section 605 of WQA's enabling Act, as amended by AB279 (Rubio) effective January 1, 2024, grants the WQA the authority to impose an annual pumping right assessment not to exceed \$20 per acre-foot. Additionally, Section 608 of the enabling Act grants WQA the authority to annually adjust the assessment rate by an amount not to exceed the percentage change in the regional Consumer Price Index - All Urban Consumers (CPI). The increase in the CPI for FY 24/25 and FY 25/26 is 3.9% and 3.0%, respectively, resulting in an allowable maximum assessment of \$21.40.
